

LABOR, FAITH AND CIVIL RIGHTS COALITION IN DEFENSE OF THE PUBLIC SECTOR PRESENTS:

and for Good Jobs!

The public sector is broad, including but not limited to, public school employees and students, city public works employees such as in sanitation or street services, maintenance workers, patient care givers, public administration workers, postal service workers, veterans hospital care providers, police and firefighters, and so on. Public service workers at every level and public services for every community are under attack - through mass lay-offs closing vital services, pensions being slashed, years with wage increases and severe undersaffing and more.
